LADO PAINTS

A reliable cow dung paint manufacturer in India, **LADO PAINTS PVT. LTD.** stands out as a leading innovator. Established in 2025 in Bihar. By harnessing cow dung as the primary ingredient, **LADO PAINTS** produces organic paints that blend tradition with science, certification for quality and safety.

In the heart of India's sustainability movement, cow dung paint is emerging as a game-changer in the eco-friendly building materials sector. Rooted in ancient traditions where cow dung was used for its natural insulating and antimicrobial properties, modern formulations have transformed this humble resource into a durable, non-toxic paint suitable for contemporary homes and spaces. As environmental concerns rise, cow dung paint offers a low-VOC (Volatile Organic Compounds), biodegradable alternative to chemical-based paints, reducing indoor pollution and promoting thermal insulation—potentially lowering room temperatures by 4-5 degrees.

Why Choose Cow Dung Paint from **LADO PAINTS** ?

Cow dung paint isn't just eco-friendly—it's a practical, cost-effective solution for modern living. Sidvig's products are odorless, anti-bacterial, anti-fungal, and free from heavy metals, making them ideal for families, schools, and healthcare facilities. Key benefits include:

Sustain ability and Health They're also naturally thermal-insulating, energy-efficient, and biodegradable.

Durability and Versatility Washable and available in a wide color range for a smooth, uniform look.

Economic Edge Priced competitively (often 20-30% lower than synthetic paints), they support Indian farmers

Application Simplicity Recommended process: 1 coat organic putty + 1-2 coats primer + 2 coats emulsion for optimal results.

PARI

SHYNE EMULSION

Pari Shyne Emulson is designed for both exterior and interior masonry surfaces. It is formulated with an acrylic co-polymer with silicon additive for better water-resistant properties. LADO PAINTS

ACRYLIC WASHABLE
DISTEMPER

Lado Paint Acrylic Distemper is made using cow dung and other natural ingredients, making it an excellent interior wall paint for our homes. It is entirely eco-friendly, antibacterial, and has better coverage than other chemical paints in the market. Give your walls a calm, natural finish with Lado Paint Acrylic Distemper. Made using cow dung and selected natural ingredients, this interior-grade distemper brings a soft, breathable coat ideal for bedrooms, living rooms, pooja spaces, and study areas. The low-odour, eco-forward formula supports a comfortable indoor vibe and is a mindful alternative to harsh chemical paints. For best results, prepare the surface, apply primer on fresh plaster or porous areas, and finish with 2–3 coats of distemper.

Available Pack Sizes

1 ltr | 4 ltr | 10 ltr | 20 ltr

SUPER
INTERIOR WALL PRIMER

Lado Paints Super Interior Wall Primer is a water-based paint. It is Eco-friendly, superior in quality and long-lasting in nature. It is made mainly from cow dung as a raw material, which makes it a natural and eco-friendly paint. Create a strong, uniform base with Super Interior Primer.
